

**Ground Water Contamination
Susceptibility Assessment Survey Form**
Version 2.2

Important Please complete one form for each ground water source (well, well field, spring) used in your system.
Photocopy as necessary.

Part I: System Information

Well Owner:	Thurston PUD	Well Manager:	Thurston PUD
Water System Name:	Prairie Ridge 605	Water System Number:	2356
County:	Thurston	1/4, 1/4, Sec, T, R:	NW, NE, S34, T19N, R01W.
Source Name:	PR Well Field (S01, S02)	WA well ID tag number:	AKY156, AAE334
Source Number:	S03	Population Served:	778
Number of Connections:	303		

Latitude: **47° 5' 40.08"**

Longitude: **122° 47'11.07"**

How was lat/long determined?

☐	GPS device
☐	survey
☐	topographic map
☒	other

Part II: Well Construction and Source Information

1) Date well originally constructed: 1980 last reconstructed: n/a

2) Well Driller: **Keith Hardware**

3) Type of Well:

☒	Drilled:	Cable	(rotary, bored, cable, dug)
☐	Other:		(spring, lateral collection, driven, jetted, other)
	Comments:		unknown

4) Well Report Available? **Yes** yes/no

If no well log is available, please attach any other records documenting well construction; e.g. boring logs, "as built" sheets. Engineering reports, well reconstruction logs.

5) Completed Well Depth: 174.7 feet

6) Average pumping rate: 137.0 gpm
Source of information: Pumping test
If not documented, how was the pumping rate determined?

7) Is this source treated? **no** yes/no (disinfection, filtration, carbon filter, airstripper, other)
If so, what type of treatment:

purpose of treatment (describe materials to be removed or controlled by treatment):

8) If source is chlorinated, is a chlorine residual maintained? ☐ yes/no
Residual level (at point closest to source): ppm

Part III: Hydrogeologic Information

1) Depth to top of open interval: **163.7** ft

2) Depth to groundwater (static water level):

133.70 ft

☒ **No** flowing artesian well/spring

How was the water level determined: electronic sounder

3) If the source is a flowing well or spring, what is the confining pressure?

N/A psi

N/A ft

4) If the source is a flowing well or spring, is there a surface impoundment, reservoir, or catchment associated with this source:

☒ **n/a** yes/no

5) Wellhead elevation (height above mean sea level): **284.0** ft

how was elevation determined?

☒ topographic map

☐ drilling/well log

☐ altimeter

☐ other

6) Confining layers: (This can be completed only for those sources with a drilling log, well log, or geologic report describing subsurface conditions. Please refer to assistance package for example.)

☒ **yes** (yes/no) Is there evidence of a confining layer in the well log?

If there is evidence of a confining layer, is the depth to ground water more than 20 feet above the bottom of the lowest confining layer?

Comments: The depth to ground water is approximately 18.3 ft above the bottom of the lowest confining layer.

7) Sanitary setback: **100** ft (If less than 100 feet, describe the site conditions):

8) Wellhead Construction:

☐ in wellhouse

☒ in doghouse

☐ outside

☒ controlled access:

☐ other uses for wellhouse:

9) Surface seal:

☒ 18 ft

☐ >18 ft

☐ <18 ft (no DOE approval)

☐ <18 ft (with DOE approval, include documentation)

☐ no surface seal

☐ unknown

10) Annual rainfall:

☐ <10 in/yr
☐ 10-25 in/yr

☒ >25 in/yr

Part IV: Mapping Your Ground Water Resource

1) Annual volume of water pumped: **1,686,643** Cubic Feet

How was this determined?

☐ meter

☒ estimated:

pumping rate:

137.0 gpm

pumping capacity:

137.0 gpm

☐ other:

aquifer/screen

10 ft

2) "Calculated Fixed Radius" estimate of groundwater movement: (see Instruction Packet)

groundwater travel time; 6 mo.

328 ft

$$r = [(Q*t)/(\pi*\eta H)]^{0.5}$$

groundwater travel time; 1 yr.

463 ft

where: r = radius (ft)

groundwater travel time; 5 yr.

1036 ft

Q = flow (ft³/yr)

groundwater travel time; 10 yr.

1465 ft

t = time (yr)

η = porosity (0.25 assumed)

length of screened/open interval:

10.0 ft

H = screen/aquifer height (ft)

3) Is there a river, lake, pond, stream, or other surface water body within the six month travel boundary?

☒ no yes/no (if yes, identify on a map and describe below)

4) Is there a stormwater and/or wastewater facility, treatment lagoon, or holding pond located within the six month time of travel boundary? (if yes, identify on a map and describe below)

There are two stormwater infiltration basins located approximately 900 and 1,200 feet from the well field; the stormwater infiltration basins are vegetated and serve the Prairie Ridge plat, and appear to have been in place since the early 1980's.

Part V: Assessment of Water Quality

1) Regional sources of risk to groundwater:

Please indicate if any of the following are present within a circular area around your water source having a radius up to and including the five year ground water travel time:

	6 mo.	1 yr	5 yr	none / unknown
likely pesticide application	X			
stormwater injection wells				X
other injection wells				X
abandoned ground water well				X
landfills, dumps, disposal areas				X
known hazardous materials clean-up site				X
water systems with water quality problems				X
population density >1 house/acre	X			
residences commonly having septic tanks	X			
wastewater treatment lagoons				X
sites used for land application of waste				X

Identify on a map all of the risks listed above which are located within the six month time of travel boundary. (Please include a map of the wellhead and time of travel areas within this form. Please indicate any of the following.) If other potential sources of groundwater contamination exist within the ten year time of travel circular zone around your supply, please describe:

The well is located in an area of single family homes on approximate 1 acre parcels with OSS and possible minor use of residential home and lawn care products. An ecology site interaction is tagged approximately 1,200 feet from the well; the facility ID is 19292, and is a general permit for clearing and grading of >1 acre; the activity appears to have been completed and the site interaction closed in 2010.

2) Source specific water quality records:

Please indicate the occurrence of any test results since 1986 that meet the following conditions: (Unless listed on the assessment, MCLs are listed in assistance package.)

	MCL/detection	level >MCL?
A. Nitrate:	10 mg/l	no
B. VOCs:	5 ug/l	no
C. EDB:	0.05 ug/l	n/a
D. DBCP:	0.2 ug/l	n/a
E. Other SOC (detectable)		no
F. PFAS	4ng/L	no

If any SOC's in addition to EDB/DBPC were detected, please identify and date. If other SOC tests were performed, but no SOC's detected, list methods here:

G. Bacterial Contamination:

Are any bacteriological test samples available	yes	yes/no
Any bacterial detection from the source within past 3 years:	no	yes/no
Any bacterial detection in the distribution system and attributed to the source within the past 3 years:	no	yes/no

Part VI: Geographic or Hydrologic Factors contributing to a non-Circular Zone of Contribution

The following questions will help identify those groundwater systems which may not be accurately represented by the calculated field radius (CFR) method described in Part IV. For these sources, the CFR areas should be used as a preliminary delineation of the critical time of travel zones for that source. As a system develops its Wellhead Protection Plan for these sources, a more detailed delineation method should be considered.

- 1) Is there evidence of obvious hydrologic boundaries within the ten year time of travel zone of the CFR? (does the largest circle extend over a stream, river, lake, or up a steep hillside, mountain or ridge?)

No yes/no if yes, describe with references to the map produced in Part IV:

Comments:

2) Aquifer Material

A) Does the drilling, well, or other geologic/engineering report identify that the well is located in an area where the underground conditions are identified as fractured rock and/or basalt terrain?

no yes/no

no yes/no

3) Is the source located in an aquifer with a high horizontal flow rate?

(These can include sources located on flood plains of large rivers, artesian wells with high water pressure, and/or shallow flowing wells and springs.)

☒ **No** yes/no

4) Are there other high capacity wells (agricultural, municipal, and/or industrial) located within the CFRs?

a) Presence of ground water extraction wells removing more than approximately 500 gpm within:

☐ 6 mo. travel time
☐ 1 yr. travel time
☐ 5 yr. travel time
☒ **no** 10 year travel time

b) Presence of ground water recharge wells (dry wells) or heavy irrigation within:

☐ 6 mo. travel time
☐ 1 yr. travel time
☐ 5 yr. travel time
☒ **no** 10 year travel time

5) Please identify or describe additional hydrologic or geographic conditions that you believe may affect the shape of the contribution zone for this source. Reference them to locations on the map in Part IV.

**Ground Water Contamination
Susceptibility Assessment Survey Form**
Version 2.2

Important Please complete one form for each ground water source (well, well field, spring) used in your system.
Photocopy as necessary.

Part I: System Information

Well Owner:	Thurston PUD	Well Manager:	Thurston PUD
Water System Name:	Prairie Ridge 605	Water System Number:	2356
County:	Thurston	1/4, 1/4, Sec, T, R:	SW, SE, S34, T19N, R01W.
Source Name:	PR Well Field (S01, S02)	WA well ID tag number:	AGN780, ALG212
Source Number:	S04/05	Population Served:	778
Number of Connections:	303		

Latitude: **47° 5' 2.66"**

Longitude: **122° 47'11.25"**

How was lat/long determined?

☐	GPS device
☐	survey
☐	topographic map
☒	other

Part II: Well Construction and Source Information

1) Date well originally constructed: 2005 last reconstructed: n/a

2) Well Driller: **Arcadia Drilling Inc**

3) Type of Well:

☒	Drilled:	Cable	(rotary, bored, cable, dug)
☐	Other:		(spring, lateral collection, driven, jetted, other)
	Comments:		unknown

4) Well Report Available? ☒ **Yes** yes/no

If no well log is available, please attach any other records documenting well construction; e.g. boring logs, "as built" sheets. Engineering reports, well reconstruction logs.

5) Completed Well Depth: 151.0 feet

6) Average pumping rate: 123.0 gpm

Source of information: Pumping test

If not documented, how was the pumping rate determined?

7) Is this source treated? ☒ **no** yes/no (disinfection, filtration, carbon filter, airstripper, other)

If so, what type of treatment:

purpose of treatment (describe materials to be removed or controlled by treatment):

8) If source is chlorinated, is a chlorine residual maintained?

Residual level (at point closest to source):

	yes/no
	ppm

Part III: Hydrogeologic Information

1) Depth to top of open interval: **141.0** ft

2) Depth to groundwater (static water level):

112.00 ft

☒ **No** flowing artesian well/spring

How was the water level determined: electronic sounder

3) If the source is a flowing well or spring, what is the confining pressure?

N/A psi

N/A ft

4) If the source is a flowing well or spring, is there a surface impoundment, reservoir, or catchment associated with this source:

☒ **n/a** yes/no

5) Wellhead elevation (height above mean sea level): **255.0** ft

how was elevation determined?

☒ **X** topographic map

☐ drilling/well log

☐ altimeter

☐ other

6) Confining layers: (This can be completed only for those sources with a drilling log, well log, or geologic report describing subsurface conditions. Please refer to assistance package for example.)

☒ **yes** (yes/no) Is there evidence of a confining layer in the well log?

If there is evidence of a confining layer, is the depth to ground water more than 20 feet above the bottom of the lowest confining layer?

Comments: The depth to ground water is approximately 29 ft above the bottom of the lowest confining layer.

7) Sanitary setback: **100** ft (If less than 100 feet, describe the site conditions):

8) Wellhead Construction:

☐ in wellhouse

☐ in doghouse

☒ **X** outside

☒ **X** controlled access:

☐ other uses for wellhouse:

9) Surface seal:

☒ **X** 18 ft

☐ >18 ft

☐ <18 ft (no DOE approval)

☐ <18 ft (with DOE approval, include documentation)

☐ no surface seal

☐ unknown

10) Annual rainfall:

☐ <10 in/yr
☐ 10-25 in/yr

☒ >25 in/yr

Part IV: Mapping Your Ground Water Resource

1) Annual volume of water pumped: **1,514,581** Cubic Feet

How was this determined?

☐ meter

no

☒ estimated:

pumping rate:

137.0 gpm

pumping capacity:

137.0 gpm

☐ other:

aquifer/screen

5 ft

2) "Calculated Fixed Radius" estimate of groundwater movement: (see Instruction Packet)

groundwater travel time; 6 mo.

439 ft

$$r = [(Q*t)/(\pi*\eta H)]^{0.5}$$

groundwater travel time; 1 yr.

621 ft

where: r = radius (ft)

groundwater travel time; 5 yr.

1389 ft

Q = flow (ft³/yr)

groundwater travel time; 10 yr.

1964 ft

t = time (yr)

η = porosity (0.25 assumed)

length of screened/open interval:

5.0 ft

H = screen/aquifer height (ft)

3) Is there a river, lake, pond, stream, or other surface water body within the six month travel boundary?

☒ no yes/no (if yes, identify on a map and describe below)

4) Is there a stormwater and/or wastewater facility, treatment lagoon, or holding pond located within the six month time of travel boundary? (if yes, identify on a map and describe below)

No

Part V: Assessment of Water Quality

1) Regional sources of risk to groundwater:

Please indicate if any of the following are present within a circular area around your water source having a radius up to and including the five year ground water travel time:

	6 mo.	1 yr	5 yr	none / unknown
likely pesticide application	X			
stormwater injection wells				X
other injection wells				X
abandoned ground water well				X
landfills, dumps, disposal areas				X
known hazardous materials clean-up site				X
water systems with water quality problems				X
population density >1 house/acre	X			
residences commonly having septic tanks	X			
wastewater treatment lagoons				X
sites used for land application of waste				X

Identify on a map all of the risks listed above which are located within the six month time of travel boundary. (Please include a map of the wellhead and time of travel areas within this form. Please indicate any of the following.) If other potential sources of groundwater contamination exist within the ten year time of travel circular zone around your supply, please describe:

The well is located in an area of single family homes. Most homes are on small lots and served by City of Lacey Sewer, however some older homes are served by OSS. Several ecology site interactions are tagged in the 5 and 10 year time of travel radius of the wells. Most are residential construction related general stormwater permits, however there is a gas station located approximately 1,300 feet from the wells, and a Target Warehouse located approximately 1,700 feet from the wells.

2) Source specific water quality records:

Please indicate the occurrence of any test results since 1986 that meet the following conditions:

(Unless listed on the assessment, MCLs are listed in assistance package.)

	MCL/detection	level >MCL?
A. Nitrate:	10 mg/l	no
B. VOCs:	5 ug/l	no
C. EDB:	0.05 ug/l	n/a
D. DBCP:	0.2 ug/l	n/a
E. Other SOC (detectable)		no
F. PFAS	4ng/L	no

If any SOC's in addition to EDB/DBPC were detected, please identify and date. If other SOC tests were performed, but no SOC's detected, list methods here:

G. Bacterial Contamination:

Are any bacteriological test samples available	yes	yes/no
Any bacterial detection from the source within past 3 years:	no	yes/no
Any bacterial detection in the distribution system and attributed to the source within the past 3 years:	no	yes/no

Part VI: Geographic or Hydrologic Factors contributing to a non-Circular Zone of Contribution

The following questions will help identify those groundwater systems which may not be accurately represented by the calculated field radius (CFR) method described in Part IV. For these sources, the CFR areas should be used as a preliminary delineation of the critical time of travel zones for that source. As a system develops its Wellhead Protection Plan for these sources, a more detailed delineation method should be considered.

- 1) Is there evidence of obvious hydrologic boundaries within the ten year time of travel zone of the CFR? (does the largest circle extend over a stream, river, lake, or up a steep hillside, mountain or ridge?)

No yes/no if yes, describe with references to the map produced in Part IV:

Comments:

2) Aquifer Material

A) Does the drilling, well, or other geologic/engineering report identify that the well is located in an area where the underground conditions are identified as fractured rock and/or basalt terrain?

no yes/no

B) Does the drilling, well, or other geologic/engineering report identify that the well is located in an area where the underground conditions are primarily identified as coarse sand and gravel?

☒ **no** yes/no

3) Is the source located in an aquifer with a high horizontal flow rate?

(These can include sources located on flood plains of large rivers, artesian wells with high water pressure, and/or shallow flowing wells and springs.)

☒ **No** yes/no

4) Are there other high capacity wells (agricultural, municipal, and/or industrial) located within the CFRs?

a) Presence of ground water extraction wells removing more than approximately 500 gpm within:

☐ 6 mo. travel time
☐ 1 yr. travel time
☐ 5 yr. travel time
☒ **no** 10 year travel time

b) Presence of ground water recharge wells (dry wells) or heavy irrigation within:

☐ 6 mo. travel time
☐ 1 yr. travel time
☐ 5 yr. travel time
☒ **no** 10 year travel time

5) Please identify or describe additional hydrologic or geographic conditions that you believe may affect the shape of the contribution zone for this source. Reference them to locations on the map in Part IV.

2) "Calculated Fixed Radius" estimate of groundwater movement: (see Instruction Packet)

groundwater travel time; 6 mo.

296 ft

$$r = [(Q*t)/(\pi*\eta H)]^{0.5}$$

groundwater travel time; 1 yr.

419 ft

where: r = radius (ft)

groundwater travel time; 5 yr.

937 ft

Q = flow (ft³/yr)

groundwater travel time; 10 yr.

1325 ft

t = time (yr)

η = porosity (0.25 assumed)

length of screened/open interval:

5.0 ft

H = screen/aquifer height (ft)

3) Is there a river, lake, pond, stream, or other surface water body within the six month travel boundary?

☒ no yes/no (if yes, identify on a map and describe below)

4) Is there a stormwater and/or wastewater facility, treatment lagoon, or holding pond located within the six month time of travel boundary? (if yes, identify on a map and describe below)

No

Part V: Assessment of Water Quality

1) Regional sources of risk to groundwater:

Please indicate if any of the following are present within a circular area around your water source having a radius up to and including the five year ground water travel time:

	6 mo.	1 yr	5 yr	none / unknown
likely pesticide application	X			
stormwater injection wells				X
other injection wells				X
abandoned ground water well				X
landfills, dumps, disposal areas				X
known hazardous materials clean-up site				X
water systems with water quality problems				X
population density >1 house/acre	X			
residences commonly having septic tanks	X			
wastewater treatment lagoons				X
sites used for land application of waste				X

Identify on a map all of the risks listed above which are located within the six month time of travel boundary. (Please include a map of the wellhead and time of travel areas within this form. Please indicate any of the following.) If other potential sources of groundwater contamination exist within the ten year time of travel circular zone around your supply, please describe:

The well is located in an area of single family homes. Most homes are on small lots and served by City of Lacey Sewer, however some older homes are served by OSS. Ecology site 100001032 for construction activities is located within the 10-year time of travel.

2) Source specific water quality records:

Please indicate the occurrence of any test results since 1986 that meet the following conditions: (Unless listed on the assessment, MCLs are listed in assistance package.)

	MCL/detection	level >MCL?
A. Nitrate:	10 mg/l	no
B. VOCs:	5 ug/l	no
C. EDB:	0.05 ug/l	n/a
D. DBCP:	0.2 ug/l	n/a
E. Other SOC (detectable)		no
F. PFAS	4ng/L	no

If any SOC's in addition to EDB/DBPC were detected, please identify and date. If other SOC tests were performed, but no SOC's detected, list methods here:

G. Bacterial Contamination:

Are any bacteriological test samples available	yes	yes/no
Any bacterial detection from the source within past 3 years:	no	yes/no
Any bacterial detection in the distribution system and attributed to the source within the past 3 years:	no	yes/no

Part VI: Geographic or Hydrologic Factors contributing to a non-Circular Zone of Contribution

The following questions will help identify those groundwater systems which may not be accurately represented by the calculated field radius (CFR) method described in Part IV. For these sources, the CFR areas should be used as a preliminary delineation of the critical time of travel zones for that source. As a system develops its Wellhead Protection Plan for these sources, a more detailed delineation method should be considered.

- 1) Is there evidence of obvious hydrologic boundaries within the ten year time of travel zone of the CFR? (does the largest circle extend over a stream, river, lake, or up a steep hillside, mountain or ridge?)

No yes/no if yes, describe with references to the map produced in Part IV:

Comments:

2) Aquifer Material

A) Does the drilling, well, or other geologic/engineering report identify that the well is located in an area where the underground conditions are identified as fractured rock and/or basalt terrain?

no yes/no

B) Does the drilling, well, or other geologic/engineering report identify that the well is located in an area where the underground conditions are primarily identified as coarse sand and gravel?

yes yes/no

3) Is the source located in an aquifer with a high horizontal flow rate?

(These can include sources located on flood plains of large rivers, artesian wells with high water pressure, and/or shallow flowing wells and springs.)

☒ **No** yes/no

4) Are there other high capacity wells (agricultural, municipal, and/or industrial) located within the CFRs?

a) Presence of ground water extraction wells removing more than approximately 500 gpm within:

☐ 6 mo. travel time
☐ 1 yr. travel time
☐ 5 yr. travel time
☒ **no** 10 year travel time

b) Presence of ground water recharge wells (dry wells) or heavy irrigation within:

☐ 6 mo. travel time
☐ 1 yr. travel time
☐ 5 yr. travel time
☒ **no** 10 year travel time

5) Please identify or describe additional hydrologic or geographic conditions that you believe may affect the shape of the contribution zone for this source. Reference them to locations on the map in Part IV.

Subject: Wellhead Protection Area Notice
Site Address: «SITUS_STRE», «SITUS_CITY»

Dear Property Owners:

Thurston PUD is required by the Washington Department of Health to develop a wellhead protection plan for the Prairie Ridge - 605 water system. Wellhead protection involves protecting the land area surrounding our wells in order to prevent contamination of our drinking water supply. The Prairie Ridge 605 wells are located at or adjacent to **7176 44th Ave NE, 7210 Hawks Prairie Rd NE, and 7000 Tolmie Ct NE, Olympia, WA 98516**. This letter is intended to inform you of the location of our wells and protection zones, and to serve as a reminder that any hazardous material put onto the ground or into your septic system has the potential of contaminating our drinking water supply. Some potentially harmful activities to avoid are:

- Improper use of a septic system (dumping paint, household cleaners, or solvents into your septic system).
- Dumping motor oil, gasoline, antifreeze or similar fluids onto the ground.
- Heavy use of fertilizers and pesticides.
- Dumping or burying garbage in the ground.

Any unwanted or unused household hazardous materials (like those mentioned above) can be disposed of at the HazoHouse Waste and Recovery Center, 2420 Hogum Bay Road NE, Lacey, WA 98516. Call 360-867-2664 for details, hours of operation, etc.

We are fortunate to have a very good supply of high quality water. It should be everyone's intent to keep it that way for our continued good use, and for the ones that come along after us. Thank you for following these guidelines. If you have any questions about this matter, please feel free to contact Kim Gubbe, Director of Planning and Compliance at Thurston PUD 360-357-8783 ext. 125.

Tips to Avoid Septic System Trouble:

- DO take leftover household chemicals to a hazardous waste collection center for disposal.
- DO practice water conservation. Repair dripping faucets and leaking toilets, run dishwashers and washing machines only when full.
- DO learn the location of your septic system and drain field.
- DO watch Washington State Department of Health Septic System Basics 101 at:
 - <https://www.doh.wa.gov/CommunityandEnvironment/WastewaterManagement/SepticSystem/101SepticBasicsVideo>

- DON'T allow anyone to drive or park over any part of the system. Areas should be left undisturbed with only a mowed grass cover. Roots from nearby trees or shrubs may clog and damage your drain lines.
- DON'T use commercial septic tank additives. These products usually do not help, and some may hurt your system in the long run.
- DON'T poison your system by pouring chemicals down the drain. They can kill the beneficial bacteria that treat your wastewater.

What are Wellhead Protection areas?

A wellhead protection area (WHPA) is defined as the surface and subsurface area surrounding a well or wellfield that contaminants are likely to pass through and eventually reach the well(s). Most of the land in any WHPA is not owned or managed by the utility so emphasizing good stewardship and local regulations is important to protect the source and those who drink those who drink that well water

WHPA are divided into time periods. Each area represents the length of time it would take a molecule of water to travel from the area boundary to the well.

- The sanitary control area is the area immediately around the wellhead and requires protection from direct contamination.
- 1 Year includes the area that it would take a molecule of water 1 year or less to reach the well. This area is managed to protect drinking water supplies from viral, microbial, and direct chemical contamination. The 1- year area also includes the six-month time of travel.
- 5 years includes the area it would take a molecule of water 5 years or less to reach the well. This area is managed to control potential chemical contaminants.
- 10 years includes the area that it would take a molecule of water 10 years or less to reach the well. This area is managed to recognize the long-term source of drinking water and potential contamination of that source.
- A buffer zone is an area beyond the 10- year area that potentially includes the entire area that contributes water to the well source (zone of contribution). The buffer zone may include non-adjacent critical groundwater recharge areas.

What are threats facing wells?

There are a number of threats to wells, including:

- Improperly disposed of chemicals.
 - Animal wastes.
 - Pesticides.
 - Human threats.
 - Wastes injected underground.
 - Naturally occurring substances.
- (Source: Safe Drinking Water Act.)

What are the costs of contamination?

Put simply, contamination is very expensive. It is considerably more cost-effective to implement a proactive pollution prevention program to guard against groundwater contamination rather than clean up contamination. Costs for a water system with a contaminated source can include purchase of water while locating an alternate supply, hydrogeologic studies to locate alternate source water, and remediation costs
