

# CALL-EM-ALL BROADCAST

<b>System No.</b>	600	<b>System Name:</b>	Tanglewilde
<b>Date:</b>	12/19/2025	<b>Broadcast Title:</b>	Mainline Project Phase 1 Update
Message:	<p>This is an informational update from Thurston PUD, your water provider regarding your water system, Tanglewilde.</p> <p>Due to the unusual rainy weather that is affecting construction of the mainline replacement project, the contractor has temporarily postponed construction. The contractor will reevaluate and hopefully restart in early January 2026.</p> <p>Please avoid the coned off temporary pavement patches along the shoulders as they are soft due to the rains. Our field staff will continue to evaluate the construction areas to address any potential concerns. If you notice any issues, please contact the PUD.</p> <p>Where new meters have been already installed the old meter setters sticking out of the ground will be removed once the contract starts back up in 2026. If you notice any major leaking from this old plumbing, please don't hesitate to report it to the PUD.</p> <p>We appreciate your patience and understanding throughout this project and apologize for any inconvenience this may cause.</p> <p>If you have any questions, please contact our customer service department toll free at (866) 357-8783. If you would like to opt out of receiving automated calls from our office, which can include outage information and possible health emergencies, please follow the instructions at the end of this message.</p> <p>Thank you and have a good day.</p>
